Results for the current reporting period are preliminary and unaudited. We have included in this presentation our Fee Related Earnings (“FRE”) and Distributable Earnings (“DE”), which are non-GAAP financial measures, together with their reconciliations, for the periods indicated. We understand that, although FRE and DE are used by investors and securities analysts in their evaluation of companies, these measures have limitations as analytical tools, and you should not consider them in isolation or as substitutes for analysis of our results of operations as reported under IFRS. Additionally, our calculations of FRE and DE may be different from the calculation used by other companies, including our competitors in the financial services industry, and therefore, our measures may not be comparable to those of other companies.

- We are transitioning into a more significant harvesting phase in funds like Private Equity Fund V and Infrastructure Fund III, with the potential for several portfolio companies to see divestment processes move forward in 2022

Definitions

- **Distributable Earnings (DE)** is used to assess our performance and capabilities to distribute dividends to shareholders. DE is calculated as FRE deducted by current income tax expense, plus net realized performance fees, net financial income/(expenses). DE is derived from and reconciled to, but not equivalent to, its most directly comparable IFRS measure of net income.
- **Drawdown Funds** are illiquid, closed-end funds in which upfront capital commitments are allocated to investments, and funded through capital calls from limited partners over the contractual life of the fund, which typically ranges from 10-14 years.
- **Fee Earning Assets Under Management (FEAUM)** is measured as the total capital managed by us on which we derive management fees as of the reporting date. Management fees are based on “net asset value,” “adjusted cost of all unrealized portfolio investments,” “capital commitments,” or “invested capital” plus “reserved capital” (if applicable), each as defined in the applicable management agreement.
- **Fee Related Earnings (FRE)** is a performance measure used to assess our ability to generate profits from revenues that are measured and received on a recurring basis. FRE is calculated as management, incentive and other fee revenues, net of taxes, less personnel and administrative expenses, amortization of placement agents and rebate fees, adjusted to exclude the impacts of equity base compensation and non-recurring expenses.
- **Gross MOIC** represents the Gross Multiple on Invested Capital and is calculated as the total fair value of investments (realized and unrealized), divided by total invested capital.
- **Incentive Fees** are realized performance-based fees which are measured and received on a recurring basis, and not dependent on realization events from the underlying investments.
- **Net Accrued Performance Fees** represent an accrued balance of performance fees, which if each eligible investment vehicle were liquidated on the reporting date at current valuations, would be recognized as Performance Related Earnings.
- **Net IRR** represents the cash-weighted internal rate of return on limited partner invested capital, based on contributions, distributions and unrealized fair value as of the reporting date, after the impact of all management fees, expenses and performance fees, including current accruals. Net IRR is calculated based on the chronological dates of limited partner cash flows, which may differ from the timing of actual investment cash flows for the fund.
- **Pending FEAUM** refers to committed capital that is eligible to earn management fees but is not yet activated per the basis defined in the applicable management agreement.
- **Performance Related Earnings (PRE)** refer to realized performance fees (net of related taxes) less realized performance fee compensation allocated to our investment professionals. We earn performance fees from certain of our drawdown funds, representing a specified allocation of profits generated on eligible third-party capital, and on which the general partner receives a special residual allocation of income from limited partners in the event that specified return hurdles are achieved by the fund.
- **Total Assets Under Management (Total AUM)** refers to the total capital funds managed or advised by us *plus* the investments directly made by others in the invested companies when offered by us as co-investments. In general, Total AUM equals the sum of (i) the fair value of the investments of each one of the funds and co-investments; and (ii) uncalled capital, which is the difference between committed and called capital.
